PROJECT WORK-2 REPORT

On

"COLLEGE CLUB PORTAL"

Submitted by

HITHA HARISH(1BM23CS115)
HARSHA B (1BM23CS107)
GUNASHREE G(1BM23CS103)
GAYATHRI S(1BM24CS406)

Under the Guidance of
LAKSHMI NEELIMA
in partial fulfillment for the award of the degree of
BACHELOR OF ENGINEERING
in
COMPUTER SCIENCE AND ENGINEERING

B.M.S. COLLEGE OF ENGINEERING
(Autonomous Institution under VTU) BENGALURU-560019

Mar 2024

B. M. S. College of Engineering,
Bull Temple Road, Bangalore 560019
(Affiliated To Visvesvaraya Technological University, Belgaum)
Department of Computer Science and Engineering

CERTIFICATE

This is to certify that the project work entitled **"COLLEGE CLUB PORTAL"** carried out by Hitha Harish(1BM23CS115), Harsha B (1BM23CS107), Gunashree G(1BM23CS103), Gayathri S(1BM24CS406) who are bonafide students of **B. M. S. College of Engineering.** It is in partial fulfillment for the award of **Bachelor of Engineering in Computer Science and Engineering** of the Visveswaraiah Technological University, Belgaum during the year 2024. The project report has been approved as it satisfies the academic requirements in respect of **Full Stack Web Development(23CS3AEFWD)** work prescribed for the said degree.

INTRODUCTION

The College Club Portal is an innovative web-based platform designed to simplify event management and participant engagement for BMSCE Pentagram, the Mathematical Society. This portal serves as a digital hub, integrating features for showcasing upcoming and past events, as well as enabling dynamic participant registration. The aim is to streamline processes, reduce manual errors, and provide an engaging online experience for users, including students, faculty, and event organizers.

The project reflects the effective application of modern web technologies, ensuring responsive design and user-friendly navigation. It provides a centralized interface that promotes interaction, collaboration, and accessibility to club activities.

OVERVIEW

The portal is structured into four main modules:

1. Home Page: Acts as the entry point, providing a brief introduction to the club and its key members.

2. Upcoming Events Page: Lists future events, allowing users to view details and register easily.

3. Past Events Page: Archives previous events with detailed descriptions and highlights.

4. Participant Registration Page: Enables participants to register dynamically, catering to both individual and team-based entries.

Each module is designed with responsiveness and accessibility in mind, ensuring compatibility across devices and ease of use. The portal enhances the overall event management experience by providing all necessary information in one place.

MOTIVATION

Managing events manually often results in inefficiencies, such as delayed registrations, data mismanagement, and a lack of accessibility for users.

The College Club Portal was conceptualized to address these challenges by providing:

- A streamlined platform to share event details and register participants.
- A user-friendly interface to boost engagement and participation.
- A reliable digital record of past events to document achievements.

This project also serves as a learning opportunity for implementing modern web development practices, showcasing the potential of dynamic user interfaces and responsive design.

SOFTWARE REQUIREMENT SPECIFICATION (SRS)

Functional Requirements

1. Display event details, including descriptions, images, and dates.
2. Provide a dynamic registration form for individuals and teams.
3. Organize past events chronologically with expandable details.
4. Ensure responsiveness for a seamless experience across all devices.

Non-Functional Requirements

1. The platform must load quickly and provide a smooth user experience.
2. Ensure cross-browser compatibility (e.g., Chrome, Firefox, Edge).
3. Incorporate validation for input fields to ensure data accuracy.

Constraints

1. The project currently operates as a static website without backend integration.
2. All event data is hardcoded in the frontend, limiting scalability.

HARDWARE REQUIREMENTS

- Processor: Dual-core processor or higher.
- RAM: Minimum 4 GB for smooth testing and development.
- Storage: At least 500 MB for storing project files and images.
- Display: Resolution of 1366x768 or higher for optimal viewing.

SOFTWARE REQUIREMENTS

1. Operating System: Windows 10/11, macOS, or Linux.
2. Development Tools:
    - Text Editor: Visual Studio Code or Sublime Text.
    - Browser: Google Chrome, Mozilla Firefox for testing.
3. Libraries and Frameworks:
    - Font Awesome: For icons used in forms and navigation.
    - Google Fonts: For typography customization.

USER INTERFACE DESIGN

Design Principles

1. Responsive Layout: Ensures usability on desktops, tablets, and mobile devices.
2. Consistency: Uniform styling across all pages using CSS.
3. Accessibility: Features like hover effects, large buttons, and readable fonts improve accessibility.

Home Page

- Features a carousel for event highlights, an introduction to the club, and details about the core committee.

Upcoming Events Page

- Displays event details in a grid layout with hover effects and a "Register" button for each event.

Past Events Page

- Organized in a timeline format, with expandable sections for detailed descriptions of previous events.

Participant Registration Page

- Includes a dynamic form that adjusts based on the selected team size.
- Validations ensure accurate and complete data entry.
